OCTN-1 is a natural transport protein found in human cells to help actively carry Ergothioneine into cells, to protect against oxidative stress and support cellular health.

OCTN-1 是一种存在于人体细胞中的天然转运蛋白其主要功能是将麦角硫因 (Ergothioneine) 主动运输进入细胞内部,帮助细胞抵御氧化压力,并维持细胞健康。

**Wellness should be intelligent,  
evidence-based, and sustainable.**

Modern life places constant pressure on the body — mental, environmental, and physiological.

Octalis applies scientific understanding of oxidative balance, cellular health, and recovery to create wellness solutions that work with the body, not against it.

We do not stimulate or overpromise. We support the body's natural ability to restore itself.

## What is Ergothioneine 麦角硫因

### The Longevity Vitamin: Ergothioneine (EGT) The Hero of Cellular Defense

Ergothioneine is a rare, powerhouse antioxidant that the human body cannot produce on its own. It is uniquely recognized by a specialized "transporter" in your cells, allowing it to be pulled directly into the areas that need protection most.

Unlike other antioxidants that are quickly depleted, Ergothioneine remains stored within the body for up to 28 days, providing a continuous and robust shield against long-term oxidative stress.

**Deep Cellular Shield:**  
Protects DNA and mitochondria from the "biological rust" caused by modern stress.

**Cognitive Clarity:**  
Supports brain health and long-term mental resilience.

**Active Recovery:**  
Helps the body restore itself naturally without over-stimulation.

**The Golden Source:**  
Found in extraordinary concentrations within the Golden Oyster Mushroom, EGT is the cornerstone of our precision formula.

### 长寿维生素：麦角硫因 (EGT) 细胞防御的核心英雄

麦角硫因是一种罕见且强效的天然抗氧化剂。人体无法自行合成，但我们的细胞中却拥有一种专属转运蛋白，能精准地将其吸收入细胞内部，提供长效保护

与会被迅速代谢的传统抗氧化剂不同，麦角硫因能在人体内留存长达 28 天，为您构建持久且强韧的防御体系，从源头抵御长期氧化应激的侵害。

**深层细胞护盾：**  
保护 DNA 和线粒体，抵御现代压力造成的“生物锈蚀”

**守护大脑健康：**  
维持认知清晰，增强长期的精神弹性

**促进主动修复：**  
在不造成身体负担的情况下，辅助身体自然恢复活力。

**黄金来源：**  
麦角硫因在黄金菇中含量极高。这种大自然的馈赠，正是我们“精准细胞活力”配方的核心所在。
